

ROLAND DZOAGBE

Business Applications & IT Operations Manager

+33 7 82 88 46 46 • rolanddzoagbe@gmail.com • linkedin.com/in/r-dz • Bondy, France (Paris region)

PROFESSIONAL SUMMARY

Results-driven IT and business applications leader with 10+ years of experience — including 7+ years managing mission-critical, multi-site operations for international organizations. Deep expertise in business application ecosystems spanning ticketing platforms (Eventim, multi-channel), CRM, ERP, and data/reporting environments. Proven track record driving integrations across ticketing, CRM, and analytics tools; leading Microsoft Power Platform and application delivery projects; and ensuring 24/7 operational readiness. Adept at acting as the primary bridge between business stakeholders and IT, translating operational needs into scalable technology solutions. Bilingual English/French.

PROFESSIONAL EXPERIENCE

IT Infrastructure & Applications Manager

Apr 2025 – Dec 2025

Host Broadcast Services (HBS) — International, Multi-site | 600+ Users | 24/7 Mission-Critical

- Managed the full business application ecosystem across international broadcast sites, ensuring performance, reliability, and continuous improvement of all guest-facing and internal systems.
- Led integrations between operational platforms and reporting/analytics tools, designing executive performance dashboards that enabled data-driven decision-making.
- Implemented Microsoft Defender for Endpoint, MFA, and Intune/Autopilot across multi-site environments — achieving 30% faster provisioning and 80% reduction in MTTR.
- Drove application delivery and infrastructure projects including network modernisation and Windows Server upgrades using structured project and change management methodologies.
- Acted as primary liaison between executive stakeholders and IT, aligning technology roadmaps with business objectives and scalability requirements.
- Maintained 24/7 BCP and disaster recovery procedures, coordinating rapid security incident containment and escalation management.
- Automated recurring IT operations via PowerShell scripting, improving team efficiency and SLA compliance.

IT Manager — Olympic & Paralympic Games

Mar 2024 – Mar 2025

The iLUKA Collective — Multi-site Events | 250+ Users | Mission-Critical

- Led end-to-end IT operations for the Paris 2024 Olympic & Paralympic Games, owning the full business application stack including ticketing platforms (Eventim), CRM, access control, and reporting workflows.
- Oversaw multi-channel ticketing platform configuration, user training, and access management — ensuring seamless guest-facing and partner-facing operations across all event channels (web, kiosk, box office, partners).
- Drove integration between ticketing systems and analytics tools, delivering actionable reporting for leadership throughout the event lifecycle.
- Coordinated vendors and service providers to ensure uninterrupted service continuity, managing procurement, budgeting, and change management processes.
- Ensured GDPR-aligned access governance, audit traceability, and data quality across all systems.

Corporate IT Manager

May 2023 – Oct 2023

AKUR8 (InsurTech SaaS) — International | 50+ Users | High-Growth

- Managed IT operations and business application environments in a fast-scaling SaaS environment, administering IAM systems (Okta, Google Admin) and ensuring GDPR compliance.
- Led software and network upgrades following ITIL change management processes; oversaw IT budget, procurement, and vendor relationships.

IT Manager

Jul 2022 – Mar 2023

Zenly (Snapchat Group) — International SaaS | 180+ Users

- Managed end-to-end IT infrastructure and business applications for 180+ international users across Windows, macOS, and Linux.
- Administered SaaS and access management platforms (Okta, Google Admin); reduced licensing costs by 15% through systematic access audits.
- Improved IT documentation, processes, and disaster recovery readiness.

Technical Support Analyst

Jun 2021 – Jul 2022

Dechert LLP — International Law Firm | Paris, Luxembourg, Brussels

- Delivered multi-country IT support via ServiceNow, maintaining 99%+ SLA compliance in a GDPR-regulated environment.
- Administered Active Directory, Windows Server, Citrix Workspace, and mobile device management (AirWatch, Azure MDM).

IT Technician / IT Supervisor

Feb 2018 – Feb 2021

Artemys Paris — Clients: DBV Technologies, OPCO Santé | 200+ Users

- Provided Tier 2/3 support, administered Microsoft 365 and Azure environments, and led Windows Server migration projects.
- Configured Cisco switches improving network uptime by 25%; optimised onboarding/offboarding processes.

L1/L2 Support Technician

Feb 2017 – Mar 2018

Cabinet Alain Bensoussan — Law Firm | ~200 Users | Paris

- First formal IT role: Active Directory administration, IT estate management, equipment deployment, and mobile device fleet management for ~200 users.
- Configured peripheral equipment, routers, and switches; managed user accounts and AD profiles; provided N1/N2 hardware and software support.

Autodidact IT Practitioner

Apr 2008 – Feb 2017

Self-Directed | Bondy, France

- Built foundational IT expertise through independent study and hands-on practice: OS installation, hardware maintenance, custom PC builds, and software troubleshooting.
- Managed user accounts, delivered end-user technical support, liaised with suppliers, and conducted best-practice training sessions (backup, virus protection, data confidentiality).

Aide Soignant (Healthcare Assistant)

Mar 2009 – Feb 2017

Medical Institute — Romainville, France

- Developed patient-facing communication, teamwork, and high-pressure operational skills — the interpersonal and resilience foundation carried throughout a subsequent IT career.

KEY ACHIEVEMENTS

Olympic Games IT Delivery	Full ticketing & application stack for Paris 2024 Olympic & Paralympic Games across all event channels.
Ticketing Platform Ownership	End-to-end Eventim configuration, user training, partner integrations, and multi-channel access management.
Cross-System Integrations	Built integrations linking ticketing, CRM, and analytics tools — enabling leadership reporting at scale.
80% MTTR Reduction	Restructured Tier 1–3 support with ITIL KPIs across international multi-site broadcast operations.
30% Faster Deployments	Autopilot/Intune rollouts with structured project & change management; automated via PowerShell.
600+ Users, Zero Downtime	24/7 IT operations across international mission-critical environments with full BCP/DR readiness.
